SUMMARY

Full-Stack Web Developer with a proven ability to adapt in both self-starting and collaborative environments while staying focused on achieving high-quality results under a strict deadline.
I am eager to obtain a challenging position at a prestigious company that will expand my learning and builds upon my developer skills.

WORK EXPERIENCE

Full-Stack Developer, Google For Startups - *June 2022 - Oct 2022.*

Worked with the **NextUp Comedy startup** in developing their website, a comedy filming and distribution platform that showcases the most exciting comedians to a worldwide audience of comedy fans.

- Worked on the NextUp revenue and data calculation for our scheduling system.
- Created main app features like matching users with their content and assured it's fully integrated on both frontend and backend sides.
- Organization Link **-** Live Demo - **Stack**: React, Express.js

Full-Stack Developer Intern, Gaza Sky Geeks - *Jan 2022 - June 2022*

Code Academy is a 6-month full-time boot camp that provides applicants with technical training in JavaScript's frontend and backend frameworks, as well as personal skills improvement.

Projects:

Quizzer: *Demo* **-** *Code*
An app that allows teachers to build quizzes that students can take:

- Implemented intuitive user experience with React.
- Produced a robust back-end using Node.js and Express.
- Tested by unit tests using Jest with over 95% test coverage.
- Built through Agile Development, with daily meetings and action tracking via Github Projects tracker.

E-store: *Demo* **-** *Code*
E-commerce website for trading electronic devices online:

- Built with React class-based components and Express.js.
- Jest has been used for unit testing with over 90% test coverage.
- Used PostgreSQL as our database (RDBMS).

EDUCATION

July 2020 - Present **B.E in Software Engineering**, Al-Azhar University of Gaza.
July 2019 - May 2020 **High School***,* Arafat Schools For Gifted Students, **95.5%** GPA.
